Re: Request for access to documents – Final report of the rue de Terrebonne study (Les Services EXP inc.) and material referred to at the council meeting of October 6, 2026

Madam, Sir,

Under the *Act respecting Access to documents held by public bodies and the Protection of personal information* (CQLR, c. A-2.1) (the "Act"), I request access to the documents described below.

This request complements my request of September 11, 2026 concerning the study of rue de Terrebonne (your file no. 2026-581, acknowledged September 14, 2026). That request covered the final report only if it had been received by that date (item D3). Since then, Mr. Alexandre Teodoresco, city councillor for the Loyola district, has indicated that the study was carried out by Les Services EXP inc., has stated at a public council meeting that the Borough has the study, and has referred at that meeting to figures from presentation material on the subject. To avoid duplication, this request covers only the items below. Where a document is already being processed under the earlier request, a single response is fine.

Definitions

"Study"	The study of rue de Terrebonne carried out for the Borough by Les Services EXP inc. and described in my request of September 11, 2026, whatever its formal title.
"Meeting"	The regular meeting of the borough council held on October 6, 2026 (recording: https://www.youtube.com/live/0k_KZf9uxTk?t=8502; the slides are referred to at 2:21:42).
"Documents"	Documents in any form (section 1 of the Act), including emails with their attachments, presentations, spreadsheets and datasets, including documents kept on the Borough's behalf by the consultant or another third party.

A. Final report

A1. The final report of the Study, with all annexes, appendices and data files, in every version received by the Borough.

A2. Any interim, preliminary or draft deliverable of the Study received by the Borough after September 11, 2026, with the transmittal correspondence showing the date each was received.

A3. Any summary or presentation of the Study's results prepared by the consultant for the Borough.

B. Material referred to at the Meeting

During question period at the Meeting, Mr. Teodoresco stated that he was relying on "the official data provided to me by the services," which he had in front of him. He read from one slide a figure of 12 trips at peak hour in January and from another a figure of 8 trips in January, and stated that the decision

concerning the rue de Terrebonne bike path had been made “based on those slides and the numbers provided by the expert,” using Miovision data from specific counting periods.

B1. The slides referred to, and any other version of that presentation, as prepared or transmitted by the Borough’s services or the consultant, including the correspondence transmitting them to elected officials.

B2. The Miovision counts and any other data underlying the figures cited at the Meeting (including the figures of 12 and 8 trips at peak hour in January and the summer figure of 700), in native format, with the location, dates and hours of each counting period and the method of calculation.

B3. Any other presentation, briefing note or summary prepared by Borough staff or the consultant between September 11, 2026 and the date of this request concerning winter use of the cycling facilities on rue de Terrebonne.

C. Proposed winter configuration

C1. Documents dated between September 11, 2026 and the date of this request setting out any proposed winter configuration of rue de Terrebonne (traffic direction, lanes, parking or cycling facilities), including plans, signage plans, estimates of parking spaces to be gained, draft ordinances and decision summaries (sommaires décisionnels).

Processing

1. **Withheld documents.** For any document withheld in whole or in part, I ask that the decision identify the document (date, type, and author and recipient by function) and the provision relied on for each, consistent with section 50.

2. **Severance.** Where an exception applies to part of a document, I ask that the remainder be released under section 14, in particular factual content such as counts, data, dates and transmittals within documents containing opinions or recommendations.

3. **Material relied on in public.** At the Meeting, Mr. Teodoresco stated that the slides contained official data provided to him by the Borough’s services and that the decision concerning rue de Terrebonne had been made on the basis of those slides. In answer to a further question, he stated that the Borough has the Study, and the borough mayor stated that it would be made available if possible. As a deliverable produced by an engineering firm under a mandate from the Borough, and as the basis for a decision described publicly, the Study and the slides drawing on it are documents held by the public body. I ask that they be released, with any severance limited to the parts to which a specific exception applies (see item 2).

4. **Format.** I ask for electronic copies, with datasets in native format (for example Excel or CSV).

5. **Fees.** Please inform me in advance if any fees would exceed $100.

6. **Timing.** The borough council may consider a winter reconfiguration of rue de Terrebonne at its meetings of November 2 or December 7, 2026. So that residents can take part on an informed basis, I would be grateful if documents that can be released readily, particularly A1 and B2, were sent as soon as they are ready rather than held until the entire request has been processed.

Thank you for your assistance.
